

Service Program

When buying any automated piece of equipment, there's always a chance of having a mechanical breakdown. Combi Packaging Systems, LLC can provide peace of mind by helping to minimize expensive downtime by offering their Periodic Maintenance Program. This scheduled maintenance program helps to maintain your equipment in satisfactory operating condition by providing a systematic inspection thereby detecting and correcting failures either before they occur or before they develop into major defects*.

Our periodic maintenance program includes machine inspection; functionality checks; safety checks; adjustments and recommended parts replacement, performed by one of our Certified Combi Service Technicians. And while there, our technician will be available to provide additional training for your staff, if required.

Long term benefits to you?

- *Extended machine life*
- *Discounted service rates based on frequency*
- *Service rates that are locked in during term of agreement*
- *Improved system reliability*
- *Decreased costly system downtime*
- *Better spares inventory management*
