

## HOW DO YOU KNOW WHEN COMBI'S THE SOLUTION?

When two or more employees are on the same end-of-line task.

Combi's complete product line of semi- and fully automated end-of-line (EOL) packaging equipment helps manufactures:

- Overcome labor challenges during any stage of EOL packaging
- Eliminate end-of-line bottlenecks and increase throughput
- Deliver **consistent, repeatable quality** output at every stage
- Recover valuable floor space by eliminating pre-built case inventory

### STOP!

There's no reason to waste space and labor hours. Have Combi's integrated packaging experts design a solution for your customers.

### AUTOMATE ANYTHING

With our unmatched breadth of product line, Combi is the **one-stop shop** for packaging automation.

Stocked materials and U.S. assembly mean customers get up and running quickly, resulting in a swift operational impact, time-saving production gains, and quicker ROI.

### END-OF-LINE SOLUTIONS THAT ARE BUILT TO PERFORM

- **Erect:** On-demand, square case forming with no staging and no wasted space
- **Seal:** Reliable closures that reduce tape usage and lower operating costs
- **Pack:** Consistent speed and accuracy without added labor hours
- **Palletize:** Safe robotic systems with a minimum footprint for optimized stacking
- **Strap:** Rugged durability with efficient, repeatable load stability
- **Wrap:** Minimize material usage, whether mobile or inline applications
